

REMARKS

Applicants have been required to restrict the claims to one of the following inventions:

- I. Claims 1-51, drawn to an alkali silicate composite, classified in class 501, subclass 141.
- II. Claims 52-59, drawn to an alkali silicate slurry, classified in class 106, subclass 600+.
- III. Claims 60-66, drawn to an alkali metal silicate slurry containing a gel modifier (e.g., organic acid or organic base), classified in class 106, subclass 600+.
- IV. Claims 67-72, drawn to a method of making an inorganic silicate containing gel modifier, classified in class 264, subclass 65+.
- V. Claims 73-86, drawn to a glass, classified in class 501, subclass 11+.

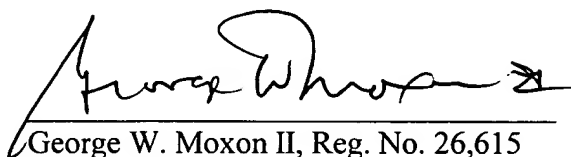

Applicants elect the claims of Group I (claims 1-51) with traverse.

The reasoning stated by the Examiner is somewhat speculative. The distinction between Group I (claims 1-51) and Group III (claims 60-66) is tenuous since the invention simply takes different form with Group I being the composition and Group III being the composition in a slurry form. Group II (claims 52-59) is the use of the slurry of Group I in making composites, while Group IV (claims 67-72) is directed to the use of the slurry of Group III which differs from the composition of Group I by the option of adding a gel modifier. All of these compositions require a reactive glass and that is what is claimed in Group V (claims 73-86). Thus, the search issues with regard to all the claims is not served by the restriction requirement.

Application No.: 09/871,998
Amendment dated: June 24, 2003
Reply to Office Action of May 29, 2003

Therefore, reconsideration and withdrawal of the restriction requirement is respectfully requested. Should the Examiner wish to discuss any of the foregoing in more detail, the undersigned attorney would welcome a telephone call.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "George W. Moxon II", with a stylized flourish at the end.
